

For the last few years, class sizes at a local university have been growing. One of the benefits to this is the increased tuition income for the school, however, students are starting to complain about the large classes, and lack of personal one on one time with their instructor. To solve this, the school has decided they will hire 5 new instructors, each one for a different class. Your task is to determine which instructor is assigned to which class, what room number the class is in and how many students are moved to the new classes.

- The math class is either Mr. Ramon's class or Mrs. Townsend's class.
- The Spanish class isn't taught by Mr. Young.
- The math class has 6 more students than the Spanish class.
- Of the Biology class and the class with 25 students, one is in room 214 and the other is taught by Townsend.
- The class with 23 students is the Algebra class.
- The course in room 112 has fewer students than the Algebra class.
- The class with 27 students isn't taught by Young.
- The Statistics class has 6 more students than the class in room 228.
- The class with 27 students isn't taught by Mr. Hartwood.
- Neither the Math class nor the Algebra class is the class in room 142.

		Room Number					Instructor					Class

- The oldest boy is wearing the Blue shirt.
- Nicholas is next to the boy who likes Strawberry ice cream.
- Harris is at the fourth position.
- Miller's favorite ice cream is Chocolate.
- The youngest boy is next to the boy that is wearing the Green shirt.
- Young is at the third position.
- The 9-year-old boy is exactly to the left of Young.
- Kevin is next to the 9-year-old boy.
- At the second position is the boy wearing the Black shirt.
- Daniel likes Strawberry ice cream.
- At the fourth position is the boy who likes Vanilla ice cream.
- The 7-year-old boy is somewhere between the boy wearing the Blue shirt and the 8-year-old boy, in that order.
- Nicholas is at the third position.

### IF YOU ENJOY LOGIC GRID PUZZLES, YOU'LL LOVE ZEBRA PUZZLES

Zebra Puzzles, sometimes known as Einstein Puzzles, are an extraordinary twist on your favorite logic grid puzzles. They use the same brain-teasing logic but in a fun storytelling way that adds a dash of mystery and challenge. Instead of just a regular grid, you get lots of different hints about categories, like color, animal, and place. Your mission? Figure out how all these hints link together. Think of Zebra Puzzles as exciting logic mazes. This type of puzzle promises a riveting mental workout that will keep you engaged while honing your problem-solving and critical thinking skills, making them a must-try for any fan of logic puzzles.
