

A local museum was hosting an art show, boasting works of art by some of the greatest art masters. What the burglar didn't know, however, was that each piece of art was only a copy. Sneaking in through an open window on the second floor, the burglar made his way through the museum grabbing four paintings as he went. Each painting was in a different location (one of which was hanging in the Rotunda) and with a different height and width. Using the clues, figure out the artist, height, width and which room each painting was hanging in.

1. The Van Gogh painting wasn't hung in the West Wing. The painting that was 30" in height had a greater width than the Renoir painting.
2. The painting with a height of 26" and a width of 41" wasn't on display in the Main Gallery.
3. The work of art that had a 22" width was a Rembrandt but it wasn't hung in the Rotunda.
4. The Degas, which wasn't 30" in width, was hung in the Main Gallery.
5. The painting in the West Wing was 34 inches exactly from top to bottom.
6. The Van Gogh wasn't hung in the East Wing but it was less than 30 inches in height.

		Height				Width				Room

- The oldest boy is wearing the Blue shirt.
- Nicholas is next to the boy who likes Strawberry ice cream.
- Harris is at the fourth position.
- Miller's favorite ice cream is Chocolate.
- The youngest boy is next to the boy that is wearing the Green shirt.
- Young is at the third position.
- The 9-year-old boy is exactly to the left of Young.
- Kevin is next to the 9-year-old boy.
- At the second position is the boy wearing the Black shirt.
- Daniel likes Strawberry ice cream.
- At the fourth position is the boy who likes Vanilla ice cream.
- The 7-year-old boy is somewhere between the boy wearing the Blue shirt and the 8-year-old boy, in that order.
- Nicholas is at the third position.

### IF YOU ENJOY LOGIC GRID PUZZLES, YOU'LL LOVE ZEBRA PUZZLES

Zebra Puzzles, sometimes known as Einstein Puzzles, are an extraordinary twist on your favorite logic grid puzzles. They use the same brain-teasing logic but in a fun storytelling way that adds a dash of mystery and challenge. Instead of just a regular grid, you get lots of different hints about categories, like color, animal, and place. Your mission? Figure out how all these hints link together. Think of Zebra Puzzles as exciting logic mazes. This type of puzzle promises a riveting mental workout that will keep you engaged while honing your problem-solving and critical thinking skills, making them a must-try for any fan of logic puzzles.
