## Football Fanatics

In a league of 12 teams where each plays the other 11 twice - home and away - each season, three football fans watched a total of 198 matches. Each fan watched their team's every match but, because each fan has been a club member for a different number of seasons, no fan has watched the same number of matches. From this information and the following clues, for each fan, can you determine their age, their team and number of matches they watched?

1. The Albion fan is older than Madelyn but watched less matches.
2. Erin is neither a Rovers fan nor did he watch most matches.
3. The Thistle fan is not the youngest.
