

Margaret and her girlfriends went shopping and had a grand time. They caught some good sales, had a great lunch at the new Italian restaurant, and headed for home before rush hour. And somehow each came home with a new pair of shoes - even Sally, who swore she wasn't a shoe collector, but yet fell in love with a pair of pumps and had to get them. Each stumbled across the perfect pair of shoes at the perfect price, even in the perfect color. Oddly enough, each not only found a different type of shoe, but also a different color. From this information and the following clues, for each girlfriend, can you determine the type of shoe purchased, the color and the price.

- The pumps were not pink.
- The boots were brown but weren't purchased by Margaret.
- Clarisse didn't buy the pumps but spent more than Sally.
- Margaret got the sandals, which cost twice as much as Sally's purchase, but weren't green.
