

## Be My Valentine - Logic Puzzle

Freddie was in love with three girls from his school. He couldn't decide which one he wanted to give his heart to so he sent all three a valentine's card. But poor Freddie was out of luck. Each girl thought the card came from someone else and Freddie was left on the sideline. From this information and the following clues, can you determine each potential sweetheart surname, the color of the card Freddie sent, and the name of the boy she believed the card was sent by?

1. Unluckily for Freddie, when Miss Jetson received her card, she thought it was from Adam.
2. When Molly received her blue colored card, she told Miss Hanson and together they worked out who the card was from. It didn't occur to either of them that it was from Freddie.
3. The girl who received the red card was convinced it came from Ethan.
4. Neither Millie nor Miss Motson received a pink card.

		Last			Color			Boy		
		Jetson	Motson	Hanson	Blue	Pink	Red	Dylan	Ethan	Adam
First	Lily									
	Millie									
	Molly									
Boy	Dylan									
	Ethan									
	Adam									
Color	Blue									
	Pink									
	Red									

First	Last	Color	Boy
Lily			
Millie			
Molly
