

Chosen Vocation - Logic Puzzle

Three students graduated from university to follow their chosen vocation - doctor, lawyer and scientist. From this information and the following clues, for each student, can you determine who went to which university, who graduated as which and their age?

1. The youngest student did not graduate as a lawyer nor go to University B.
2. The lawyer went to neither University A nor University B.
3. Peter, who did not attend University A, was the oldest of the three students.
4. The female student was older than the scientist but younger than the University C student.
5. The University C student did not graduate as a scientist.
