

Girlfriend Appreciation Day - Logic Puzzle

Three brothers (Ted, Tim and Tom) share a common trait of forgetfulness that has gotten them in hot water with their girlfriends. After a string of forgotten birthdays, anniversaries and even dates, the brothers' girlfriends were fed up. After a brainstorming session, the brothers devised a new holiday - Girlfriend Appreciation Day. For the big day, the three brothers have dates with their girlfriends. Each one bought a gift and a dozen roses of a different color. Each couple is going to a different destination on their date. From the clues, for each brother, can you determine the name of his girlfriend, the gift and color of roses he is giving her, and their date destination?

1. The brother taking Laura to a movie is not Tom nor is he the one giving his girlfriend white roses.
2. Jessica is not going to the theatre with Tom.
3. Either Vanessa or Ted's girlfriend is going ice-skating and the other is receiving red roses.
4. Tim is giving his girlfriend yellow roses.

		Woman			Gifts			Activity		
		Jessica	Laura	Vanessa	Bracelet - White R.	Candy - Yellow R.	Ring - Red R.	Ice Skating	Movie	Theatre
