

High Divers - Logic Puzzle

A local group of diving entertainers has come to town. Each one will jump from a different height to amaze the audience. Your task is to determine which diver started diving in which year, how high he or she will dive from, and how many high dives each has made.

1. Billy started diving sometime after the diver who has done 63 dives.
2. The diver who is jumping from 15 meters started diving 2 years before the jumper who has done 80 previous dives.
3. Neither the diver who jumping from 25 meters nor the diver who leaping from 15 meters up is Billy.
4. The diver who jumping from 20 meters up started diving 1 year after Marsha.
5. The diver who climbing 25 meters up started skydiving 2 years after Shelby.
6. The jumper who has done 48 previous dives doesn't isn't leaping from 25 meters.
7. The daredevil who has performed 48 jumps started diving sometime after Manuelle.
8. The diver who has done 80 previous jumps is either the one jumping from 10 meters or Shelby.

		Name				Height				# of jumps			
		Billy	Manuelle	Shelby	Vanessa	10 meters	15 meters	20 meters	25 meters	34	48	63	80
Started Diving	1992												
	1994												
	1995												
	1996												
# of jumps	34												
	48												
	63												
	80												
Height	10 meters												
	15 meters												
	20 meters												
	25 meters												

Started Diving	Name	Height	# of jumps
