

Language Learners - Logic Puzzle

Learning a new language is a challenge the local college takes seriously. On top of the mainstream languages, the college has decided to offer four new languages on the new curriculum. The languages are Fwe, Jiddu, Pomona and Tutong. Each class is held in a different room at a different time. Your goal is to determine which room, at which time each language is taught and how many students are participating in each class.

1. Of the course with 9 students and the course in room 108, one is the Pomona class and the other starts at noon.
2. The Jiddu class starts 2 hours before the class with 9 students.
3. Of the course in room 301 and the course with 18 students, one is the Jiddu class and the other starts at noon.
4. The class in room 212 is either the class with 23 students or the Fwe class.
5. The Pomona class starts sometime before the course in room 301.
6. The course with 18 students starts 2 hours after the Pomona class.
7. The Tutong class begins at noon.

		Room				Students				Language			
		108	111	212	301	9	12	18	23	Fwe	Jiddu	Pomona	Tutong
Time	8:00 AM												
	10:00 AM												
	12:00 PM												
	2:00 PM												
Language	Fwe												
	Jiddu												
	Pomona												
	Tutong												
Students	9												
	12												
	18												
	23												

Time	Room	Students	Language
