

## Loading Trucks - Logic Puzzle

Elliot works for a distributor and looking at his work sheet this morning, he has a lot of pickups to get ready for the trucks. The odd thing about today's work schedule is that all of the trucks scheduled for pickups are from independent trucking companies instead of the large trucking companies who handled the bulk of their shipping. Shrugging, he hurries off to get the scheduled goods ready for shipment. From this information and the clues provided, determine each driver, the type of goods they are picking up, and the driver's final destination.

1. Freight Away is picking up shoes but isn't going to Ohio.
2. Carl is hauling cosmetics but he isn't going to Maine.
3. Stan isn't hauling gadgets, nor is he hauling freight to Ohio.
4. The truck carrying gadgets, which isn't from Freight Fast, is going to Georgia.
