

## New Product Range - Logic Puzzle

The local supermarket was introducing a new product range - Berry, Choc and Caramel flavored puffed wheat bars - and samples were being given to customers throughout the day. It so happened that it was shopping day for customers Anna, Bella and Clara. Each did their shopping at different times 9:00 am, 9:30 am and 10:00 am - but not respectively - and took advantage of the offer, each sampling a different flavor and making a purchase. From this information and the following clues, determine the shopping time, flavor sampled and number of purchases.

1. The customer who did her shopping last purchased a lesser number of packs than Bella.
2. Clara did her shopping after the Berry purchaser and before Anna.
3. Anna purchased neither the Berry nor the Chocolate flavors.
4. Chocolate flavor ranked top of the purchases.

		Time			Flavor			# Purchased		
		9:00 am	9:30 am	10:00 am	Berry	Chocolate	Caramel	1 pack	2 packs	3 packs
Customer	Anna									
	Bella									
	Clara									
# Purchased	1 pack									
	2 packs									
	3 packs									
Flavor	Berry									
	Chocolate									
	Caramel									

Customer	Time	Flavor	# Purchased
Anna			
Bella			
Clara
