

Trip to the Doctor - Logic Puzzle

Four people visited the doctor. You wouldn't believe all the questions they ask when you're signing in! Annabelle, Heather, Kassidy and Tatum were shocked when they were asked exactly how much they earned, and even what color of a house they lived in! But, each was finally seen by a doctor and was prescribed a certain medication. Using the clues below, figure out which person earned which amount, what color house they lived in and which medication they were prescribed.

1. The 4 people were Tatum, the patient who was prescribed enalapril, the employee with the \$54,000 salary, and the owner of the purple house.
2. Of Tatum and Annabelle, one earns \$144,000 per year and the other lives in the cyan colored house.
3. The patient who was prescribed enalapril is not Heather
4. Either the employee with the \$144,000 salary or the employee with the \$158,000 salary lives in the blue colored house
5. Kassidy earns less than Heather.
6. The owner of the blue house earns more than Kassidy.
7. The patient who was prescribed ramipril is not Annabelle.
8. The owner of the lime house was prescribed enalapril for their heart condition
9. The employee with the \$144,000 salary was prescribed benazepril for their heart condition.

		Name				Prescription				House Color			
		Annabelle	Heather	Kassidy	Tatum	Benazepril	Enalapril	Fosinopril	Ramipril	Blue	Cyan	Lime	Purple
Salary	\$54,000												
	\$128,000												
	\$144,000												
	\$158,000												
House Color	Blue												
	Cyan												
	Lime												
	Purple												
Prescription	Benazepril												
	Enalapril												
	Fosinopril												
	Ramipril												

Salary	Name	Prescription	House Color
\$54,000			
\$128,000			
\$144,000			
\$158,000
